

The PMD Foundation

The PMD Foundation is a family-driven organization founded to proactively serve those affected by Pelizaeus-Merzbacher Disease through programs of education, research, service and advocacy.

Pelizaeus-Merzbacher Disease (PMD) is a rare genetic disorder that affects the central nervous system (brain and spinal cord), starting before birth, by interrupting the development and function of the white matter of the brain (myelin). Children with PMD are typically non-verbal with significant motor impairment and a greatly reduced life expectancy.

The PMD Foundation is a 501(c)3 non-profit organization. Your contribution to our cause is tax deductible.
